

PRESS RELEASE

Lumens and Newnex Collaborate on USB 3.0 Active Cable Interoperability

FREMONT, CA, May 29, 2019 – Lumens™ Integration Inc. and Newnex Technology Corp. today announced the collaboration for product interoperability between Lumens VC-B30U USB PTZ Camera and Newnex' USB 3.0 active cables, the FireNEX™-uLINK A to B series cable.

Lumens VC-B30U USB PTZ Camera is equipped with one USB 3.0 connection that can work with the video conferencing software and one HDMI connector that can be used to output video to display. With a 12x optical zoom lens, white balance, and exposure mode, the camera can capture clear images in low light, or the extreme contrast of brightness and darkness in a conference room.

As highly reliable extension solutions, Newnex' FireNEX™-uLINK USB 3.0 active cables support USB SuperSpeed data transfer up to 5Gbps up to 20 meters with backward compatibility to USB 2.0/1.1 protocols. They also deliver ample bus power to the far end devices without any external power inputs. All these features make FireNEX™-uLINK cables compatible with Lumens USB PTZ cameras seamlessly for USB extension needs.
